**Drive
the
difference.**

+STROMER-

Entering the new era of mobility with high speed.

Dear Reader,

Mobility has always meant more than simply getting from A to B. In recent years, however, people's development toward greater awareness – including in their choice of means of transport – has accelerated massively. Climate protection and the sparing use of resources as well as personal health and mental balance are more important to many than ever before.

No wonder the powerful e-bikes from Stromer are in such high demand. Because we have long believed that we can increasingly do without the car. Our strategy is clear: We build perfect Speed Pedelecs that offer so much riding joy, efficiency and quality of life that you don't miss the supposed comfort of your car.

Take pleasure in zooming past the daily gridlock instead of being stuck in it in your soft car seat. With a Stromer, you'll look forward to your ride to work every day and enjoy every turn. Thanks to the latest ABS technology, we ensure even more safety in our new models.

Fast e-bikes from Stromer make new mobility possible, which pays off for everyone in the long run: for the environment, for our traffic system, for your health. Take a test ride on your Stromer at one of our trading partners and discover the difference! We look forward to welcoming you into our community.

Jakob Luksch,
CEO of myStromer AG

The nimble e-bike for every day.

A Stromer is made for people who have much to accomplish and who also enjoy being on the go themselves. Instead of spending precious time in traffic, they take advantage of their daily commutes by using them as a gentle workout, for stress relief and sensational joy of riding – bringing more quality of life all round. Thanks to fully integrated ABS in the Stromer premium models, your safety is also provided for without compromising on design. 100,000 bike enthusiasts worldwide have already caught the Stromer bug and between them clock up over 8 million kilometers per month*. Proof enough for us – Stromer is the perfect commuter bike!

«You have to experience this riding feel for yourself!»

* Average figure for 2021 for all Stromer bikes with OMNI connectivity.

- In an exhilarating 2.9 seconds from 0 to 45 km/h
- Ideal for daily commutes up to 35 km or even more (range up to 180 km)
- Arrive without breaking into a sweat – even for the less athletic
- Highest riding safety thanks to special components
- Enjoyable whatever your riding style – whether laid-back or sporty
- Better performance at your job
- More relaxation after clocking out

Swiss standards of efficiency and quality.

The Swiss company stands for contemporary mobility with inspiring dynamics and design. With renowned Swiss innovation and engineering, we are always striving for the greatest precision, quality, high-value and efficiency.

Perfect for people and the environment.

We not only have great enthusiasm for our products, we also have just as much respect for the environment. If more people regularly ride Stromer bikes and leave the car in the garage, the better it will be for us all in the end.

Drive the difference.

What makes a ride on a Stromer so special? We think the difference comes down to its unique blend of quality, efficiency, safety and smartness. Something we have achieved by bringing together our entire expertise – from design and assembly to sales – in one place at our Stromer campus in the Swiss town of Oberwangen, near Bern.

At Stromer, we attach the greatest importance to the consistency and safety of the individual components. We are thus constantly working to make each part better. An example of this is the new ABS in the ST5 and optionally in the ST3 with Pinion gear shifting. Or the belt drive in the ST2 and optionally in the ST3: This has further increased the riding safety and durability of the models.

However, the unique riding experience always comes first for us. We are convinced: Every Stromer is more than the sum of its parts. The best thing is to feel it yourself!

Design

Connectivity

Power

Learn more
about Stromer
technology.

Design

We give shape to riding fun. The multiple award winning, integrated design combines aesthetics and technology to perfection: tidy cockpit, on-board computer integrated in the top tube, sporty, striking frame silhouette, internal cable routing and integrated battery, and virtually invisible motor in the rear axle. Stromer design is uncompromisingly joined up – for sensational roadholding and amazing side glances.

Technology that has won several awards

Integrated, clean design; clear, distinctive brand identity

Connectivity

Connected while on the go with Stromer OMNI connect. Select the handling characteristics and motor output according to your individual requirements and use smart functions such as over-the-air updates, automatic locking, keyless battery ejection and triple anti-theft protection with GPS localization. The user-friendly, free app and the on-board computer make the daily commute even more convenient – and you and your bike inseparable. More about this on p. 34.

Anti-theft protection

Locking function, alarm and GPS localization

User-friendly app

Statistics and individual motor settings

Mobile phone network | Bluetooth

Smartlock and over-the-air updates

Range

Four high-quality, extremely long-lasting batteries. Also, a regenerative brake maximizes the range. The result is plenty of energy to take you a distance of up to 180 km on a daily basis. Depending on what pedal assist level you choose – and how far you want to go in that mode. The batteries are compatible with all current models and can be charged quickly at every socket – after removal at the press of a button or directly in the bike.

Long-life batteries

Range of up to 180 km

Regenerative braking

For additional range

Power

Most efficient drive for Speed Pedelecs. The legendary rear-wheel motor of the Stromer lets you ride quietly, dynamically and efficiently at speeds of up to 45 km/h. And it delivers its power to the precise point where it is needed – straight to the hub. That gives it many advantages over a mid-mounted motor: less wear on the drive and brake, in return for more propulsion, more dynamism, more safety, more range, more elegance – and above all, more riding fun.

Powerful motor assistance

Up to 45 km/h and 850 W | 48 Nm

Rear-wheel drive

Dynamic, powerful, quiet and efficient

Low maintenance effort

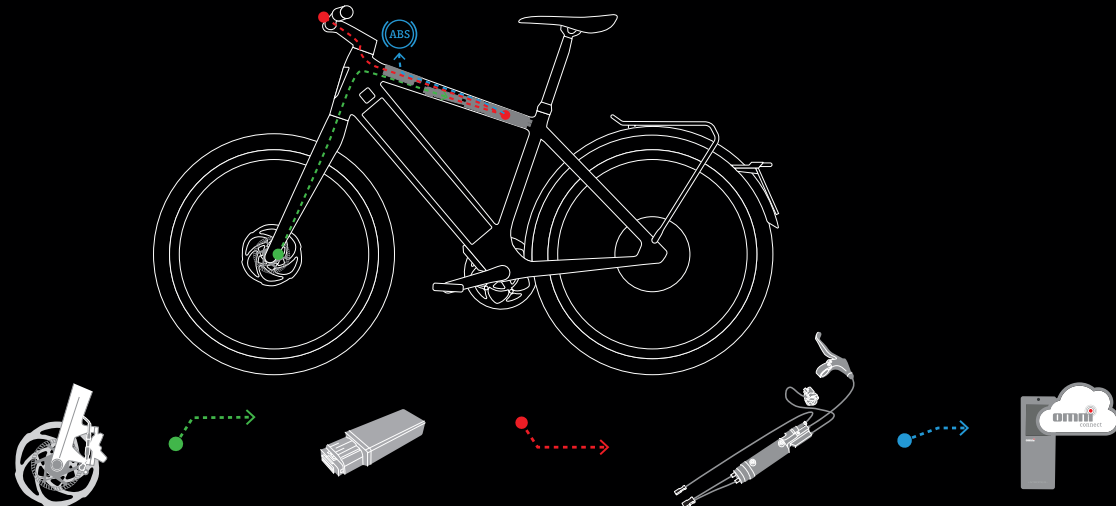

Low stress on the drive

New – fully integrated anti-lock braking system.

Stromer's premium models are available with a fully integrated anti-lock braking system. The electronically controlled braking system from Blubrake ensures that even when the brakes are fully applied, the front wheel of the Stromer does not lock up and the rear wheel does not lift off the ground. The powerful brake activation of the 4-piston brake from TRP is precisely tuned to the motor output. This means that even difficult road or traffic situations can be handled safely. Controlled braking maneuvers are possible even on slippery surfaces, and the Stromer is effectively protected against rollover.

The ABS is fitted as standard in the Stromer ST5 ABS and is optionally available in the Stromer ST3 with a Pinion gearbox. As the first e-bike up to 45 km/h with a fully integrated anti-lock braking system, Stromer thus brings a true global innovation to the market.

1 Speed sensor: measures the speed of the front wheel and transmits it to the electronic unit.

2 Electronic unit with inertial measurement: continuously evaluates the speed and detects dangerous situations that occur when braking abruptly.

3 Actuator: regulates the hydraulic pressure of the front wheel, allowing controlled braking and maintaining maneuverability.

4 OMNI C display: shows whether the ABS is working correctly and reports any errors.

More driving pleasure, safely.

The fast e-bikes from Stromer are made for the road and city traffic. For this reason, we have equipped the e-bikes with high-quality components for maximum riding safety. They enable safe handling on any terrain and ensure optimum balance, braking power, grip and visibility at all times.

With tires developed specifically for us from Pirelli for maximum road grip, a low center of gravity for ideal roadholding and extremely bright LED headlight, your Stromer remains in control in any weather.

The executive among the Speed Pedelecs.

The ST5 is our unsurpassed flagship: exclusive high-end components such as ABS and maximally integrated design for the highest performance and excellent riding dynamics.

— ST5 — Driven by Perfection

«Form and function for visionaries with forward momentum»

Radmarkt

The highlights of the ST5.

- Incomparable Stromer riding fun: powerful, dynamic and silent
- Most powerful rear-wheel motor with Sport mode with assistance up to **45 km/h** (850 W | 48 Nm)
- **High-end components** from the brakes and the electronic shifting system to the headlights and the tires
- Range: up to **180 km**
- With **fully integrated ABS** (front) for even more safety » see p. 10
- Large-volume 27.5" tires, perfectly adapted to commuting on the road (option: additional suspension)
- **Full connectivity** with over-the-air updates, free app, GPS localization, Smartlock, individual motor settings, statistics and more
- **Fully integrated design** – award-winning technology and design
- Available in Granite Grey with sports frame in M < 178 cm | L 175 – 188 cm | XL > 185 cm

The highlights of the ST3.

- Incomparable Stromer riding fun: powerful, dynamic and silent
- Very powerful rear-wheel motor with assistance up to **45 km/h** (820 W | 44 Nm)
- Range up to **150 km** (can be optionally upgraded to 180 km)
- Now available with the option of **Pinion gearbox and Gates carbon belt drive** (incl. ABS) » see p. 22
- Customizable, **comfortable riding position**
- Large-volume 27.5" tires, perfectly adapted to commuting on the road (option: additional suspension)
- **Full connectivity** with over-the-air updates, free app, GPS localization, Smartlock, individual motor settings, statistics and more
- Award winning, **integrated design**
- Available in the colors: Deep Black, Cool White
- Also available in a limited special edition with special finish, greater range and Stromer Antwerp Double Bag » see p. 32
- Frame: Sports frame in M < 178 cm | L 175 – 188 cm | XL > 185 cm; comfort frame in M < 178 cm in Cool White

Deep Black, sports frame with all options

Cool White, comfort frame

Optional – ST3 with Pinion gearbox and ABS.

From March 2022, the Stromer ST3 will be available with an optional Pinion gearbox, belt drive and fully integrated anti-lock braking system (ABS). Pinion gearboxes use technology from the automotive sector and, as a closed system, are particularly robust and virtually maintenance-free.

- The ST3 option with **9-speed shifting system C1.9 XR from Pinion** (range: 568 %) and with carbon belt drive from Gates – making it quiet, virtually maintenance-free and durable
- Additionally available with **fully integrated anti-lock braking system (ABS)**, resulting in **increased safety** during difficult braking maneuvers » see p. 10
- Customizable, **comfortable riding position**
- Frame geometry and basic equipment like with the standard model
- Colors: Deep Black and Cool White – available from May 2022
- Frame: Sports frame in M < 178 cm | L 175 – 188 cm | XL > 185 cm; comfort frame in M < 178 cm only in Cool White

Imperial Red Launch Edition (BQ983), sports frame

Deep Black, sports frame with all options

Smart connectivity – Stromer OMNI connect.

Our current Stromer models are fitted with sophisticated digital technologies. These give you seamless connectivity with your Stromer (see summary on right).

The following functions of the cloud-based platform Stromer OMNI connect are available to you via the Stromer OMNI app:

Triple anti-theft protection – your Stromer has triple protection in locked mode:

- 1. Electronic motor locking:** Your Stromer cannot be ridden without unlocking it via the app or entering the PIN on the display.
- 2. Warning message thanks to mobile communications technology:** As soon as your Stromer is moved while in locked mode, you receive a text message or an email. The bike's flashers and horn are activated.

- 3. GPS localization:** You can locate your Stromer at any time via GPS.

Smartlock – automatic locking and unlocking of the bike via Bluetooth.

Keyless – battery ejection at the push of a button.

Individual motor settings – you can use OMNI to adjust the behavior of your motor, for example to select an assistance mode or regulate the pedal and brake sensors.

Remote services and updates – information about your Stromer's current status, such as battery charge level, battery temperature and motor temperature, is available whenever you want it – including for your specialist dealer, to allow remote maintenance. Software updates are performed conveniently over the air.

Statistics – OMNI presents you with all the performance data, such as the mileage (total, current trip, current month, past year, etc.), the performance history (over the week, month, year) or the number of days ridden.

* New: Owners of an ST1 (with Daylight – from October 2021) can enable the connectivity themselves in the OMNI BT app for an additional charge.

» Upgrade options p. 46

The Stromer OMNI app – the specially developed app can also function as your digital vehicle key. As you approach your Stromer, it is unlocked automatically. As you move away from it again, the clever, integrated anti-theft protection is activated immediately. The result is carefree mobility all the time, as you always know your Stromer's location and status.

And all data for your Stromer is permanently ready to hand. Take a look at your vehicle statistics, configure your Stromer's handling characteristics, tune your vehicle to your personal preferences or check up on the service entries made by your specialist dealers.

The myStromer app is available for iOS (version 7.0 or higher) and Android (version 4.1 or higher) smartphones.

Fleet solutions – more drive for companies.

Fleet solutions from Stromer bring power into your everyday working life and make you as a company an attractive employer. The benefits are tremendous:

- No stressful traffic jams before work
- No need to search for a parking space and no parking costs
- More sustainability and climate protection
- More exercise in the fresh air
- Up to 8 times less (parking) space required than a fleet of cars
- Unique riding fun for your employees
- More satisfaction and motivation

A Stromer fleet is not only an ideal solution for companies, however, but also for sustainable **traffic concepts of cities and communities**, for example, or as a **sharing business**. Talk to us about your ideas – we will find an individual solution for you!

Request a
corporate fleet
solution.

Stromer leasing for employees.

In Switzerland as well as in Germany, Belgium, and the Netherlands, you as an employee benefit from interesting leasing offers from our partners with mobility insurance and comprehensive insurance. Simply contact your HR department or fleet manager to find out whether and to what extent your company offers leasing with our partners.

Financing for self-employed workers.

Are you self-employed and would like to lease a Stromer privately or are you looking for another financing option? Many Stromer dealers offer their own financing solutions or subscriptions. Request an individual offer.

Information
on leasing and
financing.

Experience the joy of riding for yourself – test the Stromer at events or at the dealer.

Test Ride.

We know that you have to ride a Stromer yourself to get to know its unique driving experience. For this reason, in 2022 we are once again offering a number of opportunities to put our powerful e-bikes through their paces.

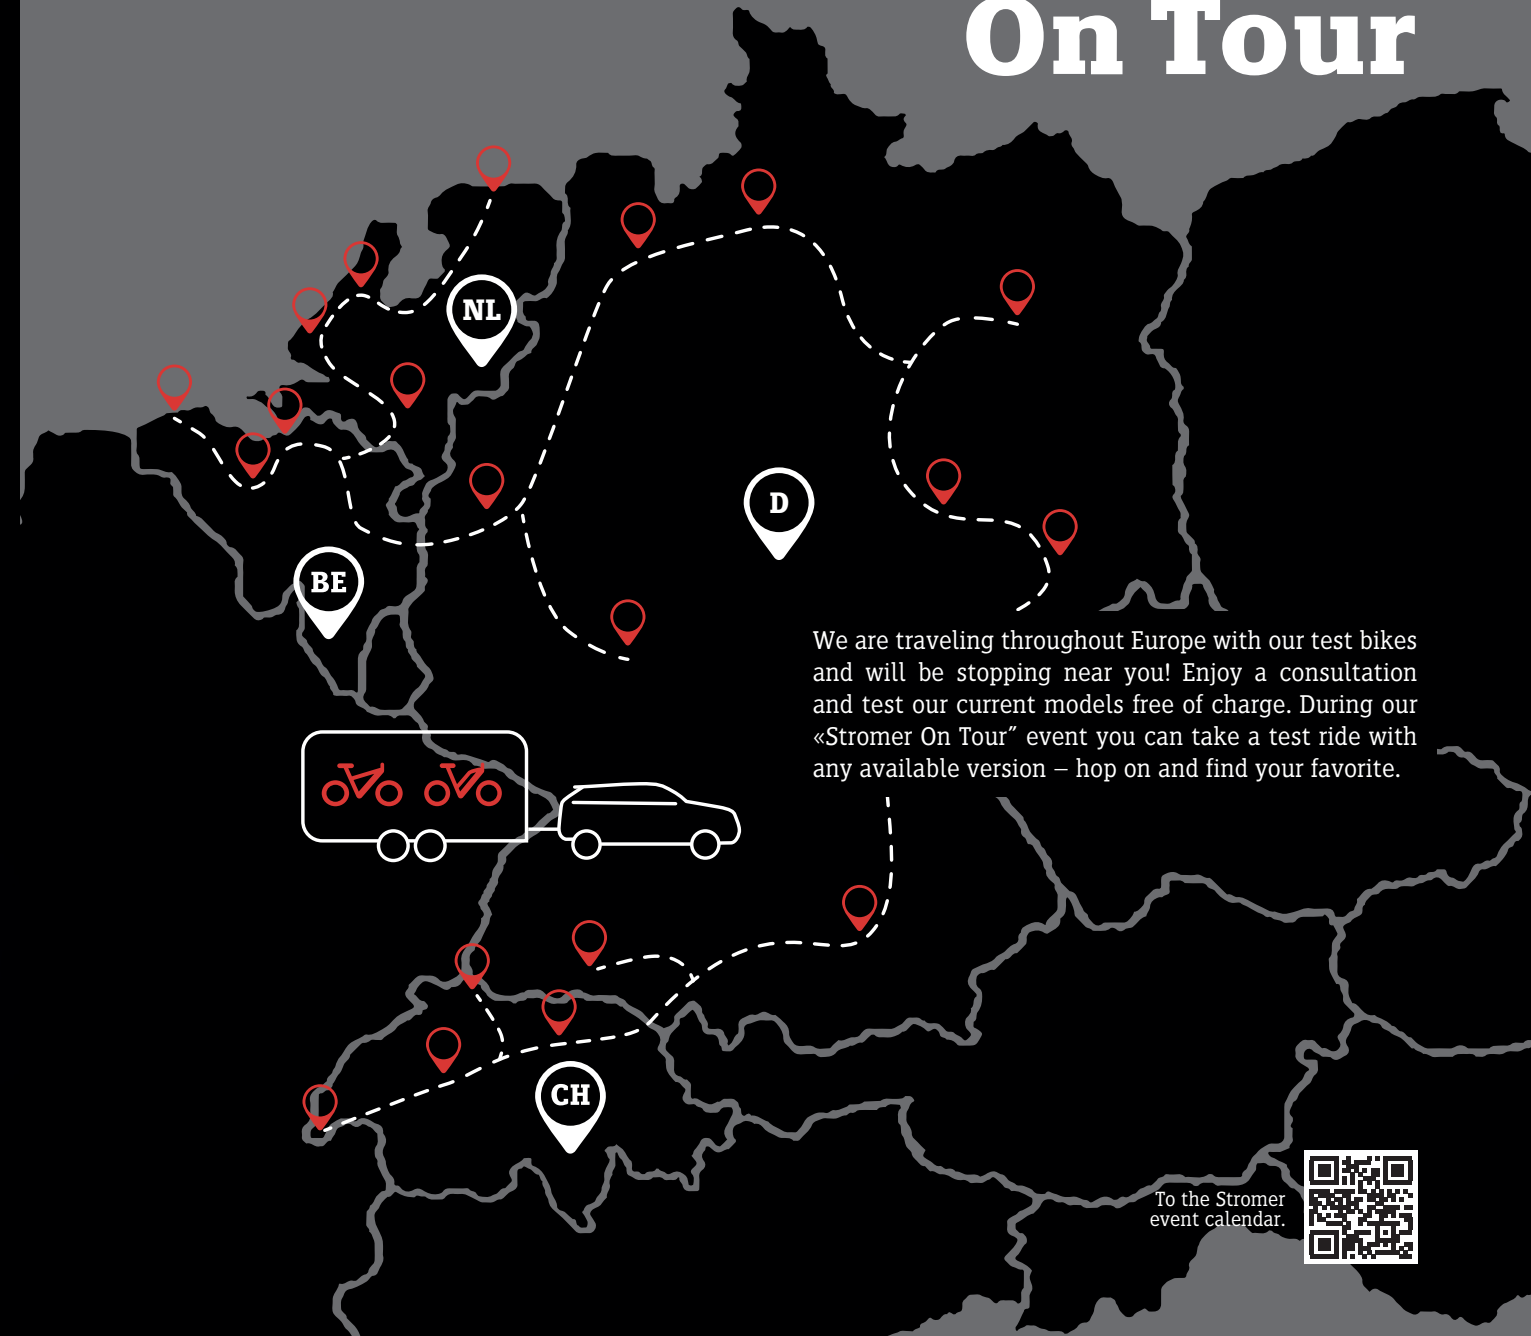

Didn't find any suitable appointments near you? Simply visit a Stromer specialist dealer near you. They will give you the best advice and you can borrow Stromer; it's best to test it for a day or two on your commute.

Contact your dealer for a test ride.

+STROMER- On Tour

We are traveling throughout Europe with our test bikes and will be stopping near you! Enjoy a consultation and test our current models free of charge. During our «Stromer On Tour» event you can take a test ride with any available version – hop on and find your favorite.

Perfect for you – the Stromer online configurator.

Why not configure your ideal model yourself? The Stromer online configurator neatly displays options available as a factory option or for retrofitting, such as paint finish, frame or equipment version.

If you aren't yet sure which model is right for you, the Stromer BikeFinder will also help you decide. Simply answer a few questions about your mobility requirements to find your perfect Stromer in three easy steps.

You already know what you want? Then simply configure your dream model at your nearest Stromer dealer and have it conveniently delivered to your home.

Scan and configure.

Optimally protected – insurance coverage and mobility packages.

In some countries, Stromer offers mobility packages for the first year that are already included in the purchase price, such as in Switzerland, Belgium and the Netherlands. Find out about the conditions in your country and, when buying a bike, also check whether theft is adequately covered by your insurance. Otherwise, your dealer will certainly have a suitable offer for you. To ensure that you are guaranteed driving fun and mobility even in the event of damage.

More on the topic of insurance.
